Looking for opportunities in FullStack Development

I am a MERN stack developer. For me programming is a great tool to solve problems. If you are looking for someone who can learn and execute skills quickly? Then you are viewing the right resume.

I am trained to listen, analyse, communicate and work on multiple things at a given time. Decision making is one of my strongest asset.

I prefer challenges than comfort at my work because that is how I get to learn.

## Work Experience

**Web developer and Social Media Marketer at Pride Globaltech (1 year 4 months) :**

- Developed and delivered 14+ projects on Wordpress and Shopify with functionality such as portfolios, e-commerce and e-learning platforms
- Direct Client interaction for the best understanding of their niche and to evaluate their expectation.

**Business Development Executive at Uprist Services (1 yr 1 months) :**

- Was instrumental in generating a revenue of more than 1.5 Cr in less than 5 months for the organization.
- Involvement in sales trainings as a core team member.
