I am a MERN stack developer. For me programming is a great tool to solve problems. If you are looking for someone who can learn and execute skills quickly? Then you are viewing the right resume.

I am trained to listen, analyse, communicate and work on multiple things at a given time. Decision making is one of my strongest asset.

I prefer challenges than comfort at my work because that is how I get to learn.

Work Experience

Web developer and Social Media Marketer at Zpex Media pvt ltd (1 year 4 months) :

- Developed and delivered 14+ projects on Wordpress and Shopify with functionality such as portfolios, e-commerce and e-learning platforms
- Direct Client interaction for the best understanding of their niche and to evaluate their requirements.

Business Development Executive at Uprist Services (1 yr 1 months) :

- Instrumental in generating a revenue of more than 1 Cr in less than 5 months for the organization.
- Involvement in sales trainings as a core team member.
- Conducted 5 online and 3 offline events & have shared the stage with great entrepreneurs like Rahul Bhatnagar & Saurabh bhatnagar.

Projects

Url Shortner :

- It's a MERN stack project where customers can create an account, login and can put any long URL that he/she wants to shorten, with features likes user authentication and my account page.

Student-Mentor Dashboard :

- Built with MERN stack on this platform user can add students, edit their details as well as user can add mentors and assign students to the mentor or department.

(currently working on a new project to build an e-commerce platform)
